

I am a truck driver in the greater LA area and have been depending on conventional radio traffic reports for over 12 years. I purchased XM Radio 2 months ago and there is no comparison between satellite radio and conventional radio traffic reports. In the LA area it is vital to get a comprehensive traffic report at all times. With conventional radio the best station gives a traffic report every 6 minutes, but because they have bills to pay & sponsors to keep happy they don't always give you the whole picture every 6 minutes so you have to wait another 6 minutes which sometimes can be 10 minutes. Well by this time you already passed your alternate route to get around the jam up. I have been wishing for a dedicated traffic only station for years, and now that I finally find one somebody is trying to shut it down.

Traffic does nothing but waste time and money. I waste thousands of dollars a year just because they don't make the roads adequate for the population, a major fault in our infrastructure. Because we have such a major major flaw we are going to have some kind of system so we can get around all the problems, jam ups, construction, and accidents, because when this happens it makes that freeway a useless parking lot that nobody wants to be in.

Satellite radio traffic reports save me time and money and its about time (a lot of time & a lot of money), so if this traffic report gets shut down I will do everything in my power to get a class action law suit to cover all the time and money wasted due to extremely bad engineering and bad planning. Our freeways in Southern California are horrible and we need this traffic report almost as bad as we need adequate road ways, but we all know we will never get adequate road ways and we already have the satellite radio traffic reports.

Shut down satellite radio traffic reports and get ready for the biggest class action suit you have ever seen. I will get every trucker, every commuter to join in. This is clearly a good idea that somebody is trying to stop just to waste my time and my money!!!!
